

Powering every mile, every day.

Camber delivers end-to-end electrification solutions for mission-critical fleets, across light, medium- and heavy-duty electric vehicles. With unmatched experience, advanced software, and 24/7 support, Camber ensures maximum uptime and long-term operational stability.

Hardware

Industry-leading charging equipment tailored to fleet needs.

Software

Intelligent, interoperable charge management to reduce downtime and e-fueling costs.

Turnkey

Design-build-operate-maintain services to simplify fleet electrification.

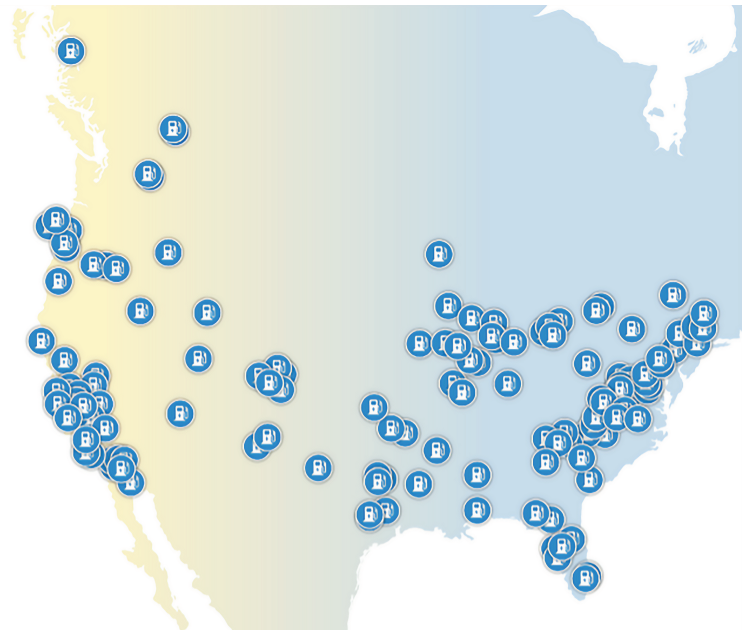

Service

Tiered support plans with 24/7 availability and a dedicated rep for every customer.

North America's Deepest Expertise in EV Fleet Charging

- **Fleet Charging Specialists:** 125M+ electric vehicle miles powered, and over 1,500 DC-fast ports deployed exclusively with fleets
- **Trusted at Scale:** 150 MW of charging capacity deployed across North America.
- **End-to-End Delivery:** Full-service support--from design and permitting to construction and maintenance--removes anxiety from electrification
- **Dedicated In-House Service:** With 24/7 availability and on-site support, Camber ensures your vehicles are always ready
- **Long-term Stability:** With strong financial backing, Camber has the stability to power your fleets for years to come

Interoperable With All Your Favorite Vehicle Partners

From charger to grid, from design through operation—Camber is your partner when uptime truly counts.
